FRANCHISEE PROGRAM

THE FOUNDATIONS
OF YOUR BUSINESS

GOLIATH **TECH**

SCREW PILE SYSTEM

WE ARE GOLIATHTECH.

THE FOUNDATIONS OF YOUR BUSINESS.

From design to installation, GoliathTech combines engineering and innovation to guarantee a solid foundation for a wide range of construction projects. Our screw piles surpass the highest industry standards.

Our helical GoliathTech screw piles are installed below the ground heave zone to solidly support the structure of your clients' projects — home extensions, new builds, decking, conservatories and much more.

Better than traditional concrete piles formed using tubes, screw piles install easily and quickly with no excavation or cure time required. And, because they are less expensive than concrete solutions, partnering with GoliathTech is a smart business investment.

MAKE A BUSINESS DECISION THAT WILL BREAK NEW GROUND

BECOME A CERTIFIED GOLIATHTECH INSTALLER

GROUNDBREAKING TECHNOLOGY

Our brand provides the best screw piles on the market installed by experts. We use cutting-edge equipment to guarantee optimal anchoring of each pile. Steadfast. Reliable. Precise. Economical. These are the foundations of the GoliathTech brand promise.

FRANCHISEE SUPPORT

When you join the GoliathTech family we make a commitment to the success of your business. We provide you with all the technology, tools and expertise of the GoliathTech brand, as well as ongoing support. GoliathTech gives you training, sales and marketing support to help you grow your business using our product.

COMMITMENT TO INNOVATION

For more than 20 years, we have combined strength with know-how to offer the best piling solutions in North America and now Europe. Our product innovation enables our franchisees to diversify their service offering, expand their business opportunities and grow their profitability.

EASY START-UP

- Be in operation quickly
- No complicated inventory requirements
- Flexible products & programs
- To meet your unique needs

TRAINING & SUPPORT

- Certification program to become a GoliathTech installer
- Ongoing sales and installation support
- Engineering assistance

SUPERIOR INSTALLATION

- Specialised equipment for installation of helical screw piles can adapt to an excavator
- No damage to landscape or structures
- Ideal for restricted spaces
- Any season operation
- Removable and reusable system

MARKETING SUPPORT

- Association with a quality, respected brand
- National advertising program
- Website branding opportunities
- Cooperative program

TERRITORY EXCLUSIVITY

A minimum of 750,000 potential clients per region

UP TO 5X MORE PRODUCTIVE

Typical productivity with helical pile installation:

Up to £600/h

FASTER THAN TRADITIONAL FOUNDATION METHODS:

Traditional concrete foundations require excavation, spoil removal, formwork and curing time — slowing down project delivery.

EXCAVATOR REQUIRED

Helical pile installation requires only compact excavation equipment fitted with a hydraulic drive head, allowing for efficient and controlled installation in a wide range of site conditions.

THE GOLIATHTECH VALUE-ADD

Helical screw piles provide a faster, cleaner and more efficient alternative to traditional concrete foundations.

Installation requires no excavation of large volumes of soil, no spoil removal and no concrete pouring or curing time. This significantly reduces site disruption and associated costs.

Because installation is rapid and can be carried out in most weather conditions, more projects can be completed within the same timeframe — increasing productivity and overall profitability.

GOLIATHTECH TECHNICAL SPECIFICATIONS

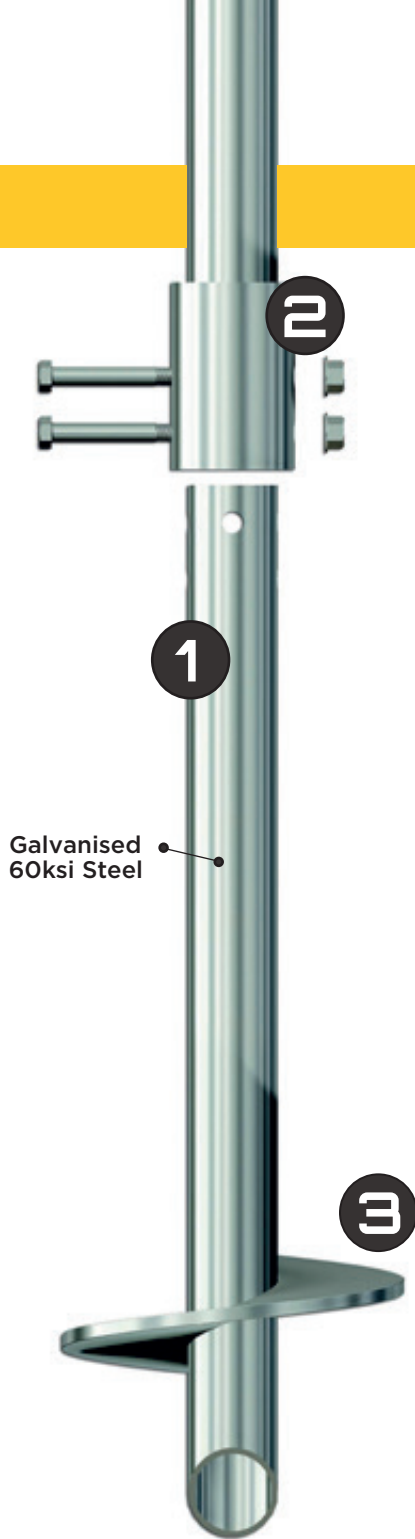

HELICAL PILE SPECIFICATIONS

Pile size from 48 mm to 324 mm
Helix diameter: 230 mm to 790 mm

*based on 10 screw piles installed hourly

STRONGER. SECURE.

1

STEEL + ZN

Superior quality galvanised steel, worthy of the most ambitious projects. Our galvanising process protects steel against corrosion to guarantee maximum longevity.

No matter where they are installed, GoliathTech piles are designed to resist the effects of ground movement, including clay heave and frost, ensuring long-term structural stability. Guaranteed!

2

GOLIATH CONNECT

This joint system allows a pile to be extended by joining two tubes using a locking bolt. Contrary to the competition's solution, this innovation strengthens long piles and eliminates all risk of movement.

3

HELIX PERFORMANCE

Engineered to advance through difficult soil profiles, the helix enables installation beyond clay layers into stable load-bearing strata.

This provides improved load transfer and consistent performance in complex ground conditions, helping resist the effects of ground movement such as clay heave and frost.

4

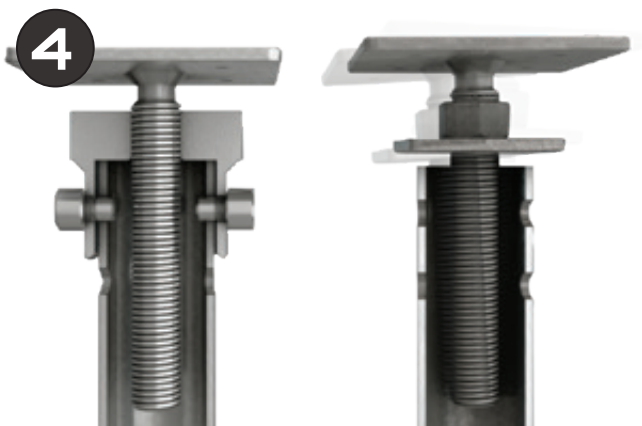

SUPERIOR ANCHORING

GoliathTech pile heads are equipped with a nut-fastening system. This exclusive anchoring solution allows the structure to be installed directly on the piles.

The innovative anchoring prevents all lateral or vertical movement.

WHY CHOOSE GOLIATHTECH?

Very few other franchise opportunities today give you the tools and resources to quickly build a sustainable venture. One that fits your business perfectly and offers a unique, profitable product.

FRANCHISEE INVESTMENT

Franchise cost	£49,500*
Mandatory Starting kit	£11,100 to £15,000
Royalty Fee	There is no Royalty Fee
Marketing Fee	6% of the Purchases
Local Marketing	3% of Gross Revenue

VARIABLE COSTS**

TRAVEL & EXPENSES WHILE ATTENDING INITIAL TRAINING

Training includes:

8 hrs. of sales training and 16 hrs. of product & installation training.

Location: Training is delivered either at our facility in Magog, Canada or locally in the UK, depending on your location.

*An additional 8 hrs. on-the-job training is required for certification.

EQUIPMENT & PRODUCT INVENTORY

Equipment needed: Trailer, excavator, vehicle and miscellaneous tools.

VEHICLE

Must be black or white pickup truck or cube van, and no older than 5 years.

COMPUTER & SOFTWARE

ADVERTISING (3 MONTHS) AND GRAND OPENING

PROFESSIONAL FEES

MISCELLANEOUS OPENING COSTS

ADDITIONAL FUNDS (3 MONTHS)

SIMPLY SUPERIOR

SUPERIOR TECHNOLOGY

- Better anchoring mechanism = less movement
- Easier, quicker installation
- Highest quality product for residential applications
- Perfectly level structures due to precision engineering

SUPERIOR INSTALLATION

- No excavation, no heavy equipment, no damage
- Compact and powerful
- Reduced build time
- Protects existing structures
- Reaches narrow spaces

SUPERIOR FRANCHISEE BENEFITS

- Increased profitability
- Marketing materials support
- Lead-generation strategies
- Business development tools
- Training and assistance

*Expansion Fee is 75% of current Initial Fee; Renewal is 25% of current Initial Fee.

**Costs vary and depend on whether the franchisee has an existing, compatible business (e.g. landscaping or construction company) with the required base equipment and vehicle.

« Unsurpassed innovation in helical piling and expert installation form the core of GoliathTech's strength. Our franchisees are carefully selected ambassadors of our brand, who share our commitment to engineering excellence, professionalism and the highest quality standards. They have access to leading-edge technology with a level of performance, strength and ease of installation that far exceeds outdated screw pile solutions available today. As your business partner we are fully committed to your success, and will make available a wealth of resources to help make your GoliathTech franchise a profitable venture. »
