| | F G H J | 1 1 1/2 2 3/8 9/16 1/4 | Weld | Note: DRAWN BY: 1. Soil capacity (P4) must be determined per Section 4.1.5 of this report. R.E 2. Maximum ultimate soil capacity is determined from Pult = Kt x T based on the corresponding maximum installation torque rating for the specific pile model. Allowable soil capacity is determined from Pa = Pult /2.0 based on the corresponding maximum installation torque rating for the specific pile model. Allowable soil capacity is determined from Pa = Pult /2.0 based on the corresponding maximum installation torque rating for the specific pile model. See Section 4.1.5 for additional information. DESIGN BY: 3. Mechanical torsion rating is the maximum torsional resistance of the steel shaft. CHECK BY: 4. Maximum Torque Per Soil Tests is the maximum torque achieved during field axial verification testing that was conducted to verify the pile axial capacity related to pile-soil interaction. APP BY: 5. Maximum Installation Torque rating is the lower of the "mechanical torsion rating" and the "maximum torque per soil tests". OTHER NO : | | | | | | | | | | Y: HTECH | A | | | | | |
