١	F	1		Note:  1. Soil capacity (P4) must be determined per Section 4.1.5 of this report.  2. Maximum ultimate soil capacity is determined from Pult = Kt x T based on the correspond maximum installation torque rating for the specific pile model. Allowable soil capacity determined from Pa = Pult /2.0 based on the corresponding maximum installation torque rat for the specific pile model. See Section 4.1.5 for additional information.  3. Mechanical torsion rating is the maximum torsional resistance of the steel shaft.  4. Maximum Torque Per Soil Tests is the maximum torque achieved during field as							ı
